Under the authority of the *Pest Control Products Act*, Health Canada's Pest Management Regulatory Agency (PMRA) has granted registration to end-use products containing technical grade triclopyr for use on pastures and rangelands. The specific uses approved in Canada are detailed on the product labels of Remedy MSO Herbicide, Release MSO Herbicide, Fencerow EC Herbicide and Garlon Ultra Herbicide (*Pest Control Products Act* Registration Numbers 28430, 28431, 28433 and 28434, respectively).

Corresponding livestock commodity maximum residue limits (MRLs) were proposed in the consultation document published on 27 April 2007, Proposed Maximum Residue Limit PMRL2007-03, *Triclopyr*. The PMRA received no comments in response to this consultation.

To comply with Canada's international trade obligations, consultation on the proposed MRLs was also conducted internationally by notifying the World Trade Organization, as coordinated by the Standards Council of Canada. No comments were received as a result of the World Trade Organization consultation.

The following MRLs are legally in effect as of the publication date of this document and are in addition to the MRLs already established for triclopyr.

Established Maximum Residue Limits for Triclopyr

Common Chemical	Chemical Name of Substance	MRL (ppm)	Food Commodities
Triclopyr	3,5,6-trichloro-2-pyridyloxyacetic acid	0.01	Milk
	3,5,6-trichloro-2-pyridyloxyacetic acid, including the metabolite 3,5,6-trichloro-2-pyridinol	0.1	Fat, meat and meat byproducts (except kidney and liver) of cattle, goats, hogs, horses and sheep

A complete list of all MRLs established in Canada can be found on the PMRA's MRL webpage.
